Why Choose

## Guaranteed Time & Cost Savings

We support you in achieving your goals by minimizing overhead costs and allowing your company to grow in a consistent and scalable way.

You save on expenses covering office space rentals, infrastructure, recruitment, taxes, legal services, and more. Outsourcing will allow you to save **at least 60%** on operational costs and expenses, and channel the focus on developing and growing your business

## Reduced Issues & Legal Liability

One of the potential risks of running a business is leaving your processes vulnerable to legal liabilities and frivolous lawsuits filed by in-house employees. However, when you work with an outsourcing company like IOS, you absolve yourself from such troubles as you're passing legal responsibilities to us.

## Administration Support & Business Flexibility

It will be our responsibility to manage wages, assume all workers' compensation, and cover liability insurance— furthering your cost savings.

Businesses have changing demands, and outsourcing allows them to meet these as they arise. Outsourcing and offshoring a portion of your business allows your company to grow and enter new markets. When necessary, you can efficiently scale down while your company re-evaluates strategies.

**Instead of worrying about various administrative tasks, data processing, and customer service— outsourcing allows you to focus on creating and growing your business.**

## Diverse & Flexible Talent Pool

Majority of the population in the Philippines are young professionals. This demographic has grown up in a technologically advanced world and thus has an innate understanding of how technology can be used to improve business solutions. This makes it an ideal place to outsource work for a range of industries, including Administrative, Legal Support, Accounting, Information Technology and, Customer Support services.

Employees are willing to work on different time schedules to cater to clients' needs, and are always eager to learn and discover new opportunities in the outsourcing industry.
